

Self Adhesive Decal

A P P L I C A T I O N

BetterLiving offers a range of large adhesive murals or small adhesive signs to assist those with cognitive disorders.

 Surface must be prepared prior to application

Prepare surface

 Use methylated spirits to clean, dry and remove all dirt, grease and silicone residue

- 1 Clean the surface to which the decal will be applied.
- 2 Mark the decal position with a felt tipped pen.

Apply the decal

- 1 Peel the decal from its backing sheet and spray a light film of mild soapy water onto the adhesive side of the decal (one drop of liquid per 5 litres of water).

If placing the decal face first, cover the front with soapy water. Cover the back if applying the decal back first.

- 2 Apply to the clean surface and position the decal to the desired position.
- 3 Using a piece of blunt plastic as a squeegee, apply pressure to the centre of the decal, stroking from the centre out to the edge, to remove and trapped air bubbles.
- 4 Gently remove the excess water with a soft cloth.
- 5 Allow to dry for a minimum of 30 minutes.
- 6 Any remaining air bubbles may be removed by pricking the air bubble with a sharp pin and smoothing out the decal.

Trim to size

Prior to application use a sharp pair of scissors or cutting blade to carefully trim to size.

Care & cleaning

To clean the decal, wipe with a clean damp cloth and dry gently. Avoid using abrasive cleaning agents or utensils (such as a wire brush).

Warranty

Novis Healthcare Pty Ltd warrants this product if faulty or defective only.
