

Outdoor Rubber Backed Mat

Ultra absorbent, extremely hard wearing

Ideal for the prevention of falls around the home.

Ultra absorbent, extremely hard wearing mat made from polypropylene loop pile with a non-slip nitrile rubber backing. Specifically designed for outdoor use, the raised pattern is especially hard wearing and will not flatten.

This mat will remove dirt and grit, plus capture and hold up to 5.4 litres of water per square metre. The nitrile rubber backing is skid-resistant and resists oil

and grease. Includes ultra grip cleats to minimise movement on both wet and dry floor surfaces. Features a low profile anti-trip tapered border to ensure the mat lies flat and reduce risk of falls.

Ideal for high traffic areas, the mat is suitable for all floor types. Easily cleaned by sweeping, vacuuming or hosing (including high pressure cleaning).
