

# Cleansing Kit

Perineal Treatment Gloves™  
2 packs each with  
12 disposable gloves  
(single use only)

Shampoo Cap™  
2 individual packs  
(single use only)

Bedbath™ Washcloths  
4 packs each with  
8 disposable washcloths  
(single use only)

Adult Wipes™  
4 packs each with  
50 supersoft adult  
premoistened wipes  
(single use only)

A patient cleansing system from Confident Care specifically designed for patients who are bedridden or who find it hard to use or tolerate showers. This complementary range of products work together to help cleanse and nourish the skin and scalp, without irritation or risk of injury to the skin.

Environmentally friendly, these products help to minimise strain on carers while reducing laundering costs and risk of cross infection.

The Cleansing Kit contains

- 4 packs of disposable washcloths,
- 2 packs of perineal treatment gloves,
- 2 shampoo caps and
- 4 packs of adult wipes.

If use of a product causes any skin irritation, discontinue use immediately and seek advice from a medical professional.

# Cleansing Kit

## Bedbath™ washcloths

Bedbath™ disposable washcloths with skin check system have a unique cleansing formula with a pH closest to that of normal healthy skin. Extra soft cloths nourish and moisturise with Aloe and Vitamin E, reducing shear and friction against sensitive skin. Ideal for all areas of the body, including the face.

These biodegradable, environmentally friendly cloths help to decrease laundry costs and nurse/patient bed bathing time. They minimise risk of cross contamination while improving overall patient skin integrity.

## Perineal Treatment Glove

The only Perineal Glove designed to cleanse, deodorise and moisturise while protecting the delicate skin of the perineum and other sensitive areas.

A one step, disposable cleaning glove with moisturising and deodorising skin protectant properties. This ultrasoft garment quality glove is delicate on the skin. It is good for ostomy sites and all areas of the body with moisture related irritation.

Only one size available.

## Shampoo Cap

Ideal for patients with dementia or patients unable to use showers or rinse basins, this shampoo cap contains a rinse-free shampoo and conditioner to clean and soften the hair.

A one step disposable system which shampoos and conditions hair without water. The shampoo and conditioner are contained in a plastic elasticised cap which is warmed, placed on the patient's head and the contents then massaged through the hair.

One size fits all.

## Adult Wipes

Made from super soft spunlace fabric for gentle and effective cleansing, these disposable wash cloths can be used to wash the face and hands of patients with high dependency needs. Impregnated with a gentle no-rinse cleansing formula which is pH balanced and hypoallergenic to soothe sensitive skin. Also contains Aloe Vera for skin conditioning.

The extra large cloths (23 x 33 cm) cover the hand for easy, one wipe cleaning. Supplied in an easy open, re-useable dispenser.

Suitable for minimising risk of infection which may occur with frequent reuse of standard face washers.
