

Highback Backrest Support

Fabric: open weave, non-allergenic brushed nylon

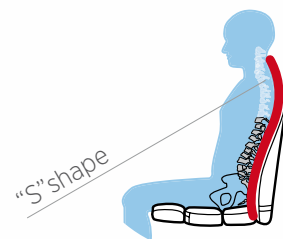

Core: three grades of high-resilient urethane foam

Frame: impact resistant polycarbonate biomechanically moulded

Extended head and neck support for added protection and comfort

Removable, adjustable lumbar pad

An award-winning portable backrest that transforms ordinary chairs into ergonomically correct seating. Ideal when driving or when headrests sit too low; or when unable to use a seat with proper support.

Also provides improved head and neck support for vehicles with bench seating.

Unlike ordinary "L" shaped chairs, the "S" shape of this backrest moulds the spine into a more anatomically correct position, helping to enhance overall posture by supporting proper spinal alignment.

- head and neck extension provides extra comfort and protection
- removable and adjustable lumbar pad for additional, customisable back support

- unique polycarbonate frame with polyurethane foam gently supports natural spine contours
- lightweight and portable; includes elastic positioning straps and handle
- hypoallergenic brushed nylon cover can be removed and sponge washed
- helps prevent fatigue, provide relief from pain aggravated by poor posture and ease pain caused by spinal disc problems and sciatica
